MCJV - QCLNG
KENYA LATERAL GAS PIPELINE
PROVISION OF CONSTRUCTION RESOURCES

September 2012
to
March 2013

In September 2012 MCJV contracted with Wasco to assist it with completion of a vital component of the QCLNG gas pipeline system.

The services provided included provision of personnel and equipment, systems and procedures to construct and test 11.5km API 5L X70 Gas Pipeline to AS2885.

Supply of resources to MCJV to assist it construct and test the 11.5km long DN500 Class 600 gas pipeline from Kenya CPP to MLV1 on the QCLNG Gas Collection Header.

Wasco's knowledge of the Australian pipeline construction environment and standards meant that MCJV and its client QGC could rely on Wasco to provide the necessary resources and know how without the need for reliance on main line resources at a critical time.

The project was completed in March 2013.
