

ENVIRONMENTAL POLICY

Wasco is committed to a policy of providing high quality services in a manner which will protect and improve the environment.

We will work closely with our clients, contractors, the community, industry, and the State and Federal Governments to establish the procedures by which our staff can make a positive contribution towards innovative and cost-effective environmental outcomes.

Responsible management of environmental issues is an essential part of achieving our business objectives.

Accordingly, we are committed to conducting our activities in ways which will:

- Continually improve our awareness and management of environmental risks and avoid, reduce, and control pollution from our operations
- Promote the open exchange of environmental information with our customers, suppliers, and the community to improve environmental awareness and to obtain feedback on our environmental performance
- Identify and comply with environmental legislation, regulation and licence standards for all our operations and environmentally relevant activities; and
- Promote waste minimisation, carbon reduction, and energy management within our day-to-day operations

Wasco, through its management and staff, will ensure its operations comply with this policy by developing, implementing, and maintaining an Environmental Management System based on AS/NZS ISO 14001.

The Environmental Management System forms part of the Wasco Integrated Management System and will:

- Set a clear policy direction for environmental issues and objectives
- Establish systems for auditing monitoring and reporting performance; and
- Identify and promptly resolve any non-conformance and document any necessary procedural changes

Mel Whyte
President
Wasco Australia
